

Rania Maaraba – design

Need to program beaded bag and item

three defined functions already in beaded bag

1) insert

inserts an item as long as it isn't already present

2) contains

checks whether or not a given item is in the bag

3) size

determines the size of the bag based on the number of items

item

-already has functions to hold the name

-check's whether or not the item given is already in the bag

beadedbag

-need to create a variable to

1) insert item

2) return t/f if it is already in the bag

3) return size
